

# Shared Drive

Shared Drive is not a replacement for a user's My Drive, but another system for group data management.

In short, Shared Drive is a file-sharing platform centered around Shared objectives. Shared Drives can be shared to Groups or Users with varying levels of access to give the highest level of visibility and security to shared resources. It alleviates the need for files to be owned by a particular user, therefore eliminating the risk of deleting user accounts and losing the data. What this means for schools is that no longer will one person own data within drive that could possibly be wiped if the user was to ever leave. Instead, the Shared structure owns the data and will exist for as long as the Shared exists regardless of users coming and going.

## Below is a breakdown of how Shared Drive compares to My Drive:

### My Drive vs. Shared Drive

Shared drives	My Drive	
What types of files can you add?	All file types except files from Google Maps	All file types
Who owns files and folders?	Your organization	The individual who created the file or folder
Can I move files and folders?	Users can only move files. Administrators can move files and folders.	Yes
Can I sync files to my computer?	With Drive File Stream: Yes With Backup and Sync: No	Yes
How does sharing work?	All team members see the same file set.	Different users might see different files in a folder, depending on their access to individual files.
How long do deleted files stay in Trash?	Each shared drive has its own trash. After 30 days, files and folders in Trash are deleted forever. Members can delete specific files sooner.	Files and folders in the Trash remain there until the user selects Delete Forever.
Can I restore files?	Yes, if you have Manager, Content manager, or Contributor access.	Yes, if you created it.

## What can you do with Shared Drives?

Google Shared Drives are shared spaces where Shareds can easily store, search, and access their files anywhere, from any device.

Unlike files in My Drive, files in Shared Drive belong to the Shared instead of an individual. Even if members leave, the files stay exactly where they are so your Shared can continue to share information and get work done.

## Set up a Shared Drive

### Create a Shared Drive

1. Open [Drive](#).
2. In the left navigation, click **Shared Drives**.
3. At top, click **New**.
4. Enter a name.
5. Click **Create**.

**Note:** If you can't create a Shared Drive, your admin might have turned off this feature. Contact your admin for help.

## User access levels

To manage shared drives and their contents, users must have the appropriate access levels.

Task	Manager	Content manager*	Contributor**	Commenter	Viewer
View shared drives and files					
Comment on files in shared drives					
Make, approve, and reject edits in files					
Create and upload files and create folders in shared drives					
Add people to specific files in shared drives					
Move files and folders within a shared drive					
Move files from one shared drive to another shared drive					
Move shared drive files into the trash					
Permanently delete files in the trash					
Restore files from trash (up to 30 days)					
Add or remove people to or from shared drives					
<a href="#">Modify shared drive settings</a>					
<a href="#">Delete a shared drive</a>					

\* Default role for new members.

\*\* Contributor access provides read-only access to files in [Drive File Stream](#) or files in the Chrome OS Files app. Assign the Content manager access level for users who need to edit files in Drive File Stream or on Chrome OS.

**Requests for access to files in shared drives**—Requests for access to shared drive files go *only* to the file creator. If the file creator is no longer a member of a shared drive, the request will be sent to the shared drive Managers.

### Add members and set permissions:

To add members and set permissions, you need **full access** permission.

1. In the left navigation, click a Shared Drive.
2. At the top, under the Shared Drive name, click **+Add Members**.
3. Add names, email addresses, or Google Groups.
4. (Optional) To change the permission from Full access, next to **Full**, click the Down arrow *arrow\_drop\_down* and choose a new permission.
5. (Optional) Enter a message.
6. (Optional) If you don't want to send notifications, select **Skip sending notifications**.
7. Choose an option:
  - Click **Send** to send notifications.
  - Click **Add** if you don't want to send notifications.

### Change member permissions

To change member permissions, you need **full access** permission.

1. In the left navigation, click a Shared Drive.
2. At the top, next to the Shared Drive name, click the Down arrow *arrow\_drop\_down* > **Manage members**.
3. Next to a member's name, click the Down arrow *arrow\_drop\_down* and select a new permission.
4. Click **Done**.

### Remove members

To remove members, you need **full access** permission.

1. In the left navigation, click a Shared Drive.
2. At the top, next to the Shared Drive name, click the Down arrow *arrow\_drop\_down* > **Manage members**.
3. Next to a member's name, click the Down arrow *arrow\_drop\_down* and select **Remove member**.
4. Click **Done**.

**Note:** If you remove someone from a Shared Drive, they might still have access to files shared in other ways, such as files shared with a link to your organization, or through group sharing.

## Add files and folders

### Create folders

#### a. Create a new folder:

1. In the left navigation, click a Shared Drive or existing folder.
2. Click **New > Folder**.
3. Enter a folder name.
4. Click Create.

**Note:** To move folders, contact your admin.

#### a. Upload an existing folder from your computer:

1. In the left navigation, click a Shared Drive folder.
2. On your computer, drag an existing folder into a Shared Drive. Or, click **New > Folder upload**. Navigate to the folder and open it.

### Add and open files

To add files to a Shared Drive, you need at least **edit access** permission. Any files you add are owned by the Shared. If you leave the Shared Drive, your files remain.

1. In the left navigation, click a Shared Drive folder.
2. Drag an existing file to upload it from your computer. Or, click **New** and choose an option:
  - To create a file, select the file type you want to create, such as Google Docs.
  - To upload a file, select **File upload**. Navigate to the file and open it.
3. Double-click a file to open it.

## Organize files

After you've added files, you can star important files, move files, and delete files.

### Star important files

Flag important files or folders to find them quickly later. Just right-click a file or folder and select **Add star**.

To see all your starred files and folders, in the left sidebar, click **Starred**.

### Move files

You can move any file you own into a Shared Drive, whether it's from another Drive location, or from your computer or mobile device.

To move files between Shared Drives or from My Drive into a Shared Drive, drag the files into the destination Shared Drive folder.

#### Notes:

- To move files between Shared Drives, you must have **full access** to the original Shared Drive and at least **edit access** to the destination Shared Drive.
- If someone else owns the file, you need to ask them to move it.
- To move folders, contact your admin.

### Delete or restore files

#### Delete a file:

You must have **full access** permission to delete a file.

Click the file you want to delete and at the top right, click Trash *delete*.

This deletes the file for everyone.

If someone accidentally deletes a file, you can restore it.

#### Restore a file:

You must have **edit access** permission or higher to restore a file.

1. In the left navigation, click a Shared Drive.
2. At top, next to the Shared Drive name, click the Down arrow *arrow\_drop\_down* > **View trash**.
3. Click a file and click Restore *history*.

## Search for files

#### Find a file in a specific Shared Drive:

1. In Search, click the Down arrow *arrow\_drop\_down*.
2. Next to Location, click **Anywhere**.
3. Double-click Shared Drives and select a particular Shared drive.
4. Click Select.
5. (Optional) Enter additional search options, such as the file type or date the file was modified.
6. Click Search.

#### Search a folder in Shared Drives:

You can only search folders that are in My Drive or Shared Drives.

1. In the search box, click the Down arrow *arrow\_drop\_down* and in the **Advanced search** window, go to the **Location** field.
2. (Optional) To search for a specific word or phrase related to the file or folder, enter the word or phrase in the search box.
3. Next to **Location**, click **Anywhere** and select **Shared Drives**.
4. When you find the folder you want to search, click Select.
5. Click SEARCH to open the folder and search for your file.

## Share and collaborate

Any files you put in Shared Drives are automatically shared with members of the Shared Drive. However, you can also share Shared Drive files with people in your organization who aren't members of the Shared Drive.

### Share files

Just like in Drive, there are different ways to share files with people in your organization who aren't in your Shared Drive. To share files, you need at least **edit access** to the files.

**Note:** Your ability to share files outside the company may be limited by your organization. Ask your admin for more information.

#### Share files with individuals or groups:

1. Click a file to share.
2. Click Share *person\_add*.
3. Add names, email addresses, or Google Groups.
4. (Optional) To change the permission from **edit**, click the Down arrow *arrow\_drop\_down* and choose another permission.
5. (Optional) Add a message.
6. Click **Send**.

If you set permissions to **view** or **comment**, you can [prevent people from downloading, printing, and copying shared files](#).

#### Email a link:

1. Click a file to share.
2. Click Share *person\_add*.
3. Click **Who has access**.
4. Next to **Link sharing off**, click the Down arrow *expand\_more*.
5. Next to the URL, click **Copy**. The link is now on your clipboard.
6. Click **Done**.
7. Paste the link into an email.

#### Share a link:

1. Click a file to share.
2. Click Share *person\_add*.
3. Click **Who has access**.

4. Next to **Link sharing off**, click the Down arrow *expand\_more*.
5. Turn **Link Sharing** on.
6. Click the Down arrow *arrow\_drop\_down* and choose a permission.
7. (Optional) To allow sharing outside your organization, click **Allow external access**.
8. (Optional) To make the document searchable in Drive, click **Findable in search results**.
9. Click **Done**.

Anyone who gets the link can access the file.

**Note:** You might not see certain options if your admin has turned them off.

## Unshare files

### Unshare files with your organization:

1. Click a file to unshare.
2. Click Share *person\_add*.
3. Click **Who has access**.
4. Turn **Link Sharing** off.
5. Click **Done**.

### Unshare files with individuals:

1. Click a file to unshare.
2. Click Share *person\_add*.
3. Click **Who has access**.
4. Next to the person, click the Down arrow *arrow\_drop\_down* > **Remove**.

**Note:** If the file you unshared is still shared with an organization or group that includes the person, they can still access the file.
