

# Send Email from Alternate Address

Gmail lets you send messages with another of your email addresses listed as the sender instead of your Gmail address. This feature helps you manage multiple accounts from the Gmail interface; it works only if you already own the email account linked to the alternate address or have delegated access to that account.

1. Sign in to your Google Apps email.
2. Click the  in the upper-right and select **Settings** along the top of any page, and select the [Accounts](#) tab.
3. Under **Send mail as**, click **Add another email address**.
4. In the Email address field, enter your name and alternate email address.
5. Click Next Step >> and then click Send Verification. Gmail will send a verification message to your other email address to confirm that you own it.
6. Locate the message in the other mail account. Open it and either click the link contained in the message or enter the confirmation code in the Accounts section of your Google Apps email settings.

## Once you're set up: sending mail

To use one of your alternate sender addresses, click the **From** link when you compose a new message. If you're replying to or forwarding a message, click the field where your recipients are listed, then click **From**. After clicking **From**, you'll see a drop-down menu next to your address, where you can select the email address you'd like to send from.

If you ever need to edit the name, configuration or reply-to address, go back to your settings. Click **edit** next to the address on your Accounts tab. To delete an address, just click **delete**.
